What is this product?

Type: Shares of a Sub-Fund of AFP UCITS ICAV, an Undertaking for Collective Investments in Transferable Securities (UCITS), established as an ICAV.

Term: The term of the Sub-Fund is unlimited. The Management Company may terminate the fund by liquidation or merger with another fund in accordance with legal requirements.

Objectives: The Sub-Fund seeks to achieve capital growth through investment in a portfolio of global equities issued by companies that have the potential to create value while having a positive impact on global sustainability in accordance with Article 9 of Regulation (EU) 2019/2088 ("Sustainable Finance Disclosures Regulation"). The Sub-Fund invests mainly in equities and equity related securities (such as common stock, depositary receipts and preferred shares) listed or traded on a permitted market that are issued by companies that seek to create value from products, services or operations which have a positive impact on particular sustainability themes (as listed below). These companies will represent a broad range of sectors and industries and may be located anywhere in the world.

A maximum of 30% of the Sub-Fund's net asset value may be invested in the equities of companies that are domiciled, listed or traded in an emerging market country defined as an "Emerging Market" by the MSCI World Index (the "Index"), and up to 10% of the Sub-Fund's net asset value may be invested in securities listed or traded on the Moscow Exchange.

The Sub-Fund may hold cash and instruments that may be readily converted to cash (such as cash deposits, treasury bills and investment grade government bonds). In normal market conditions, such investment shall not exceed 20% of the Sub-Fund's net asset value.

The Sub-Fund may use derivatives such as futures, forward and options for efficient portfolio management purposes only. The Sub-Fund is actively managed. The Index serves only as an indicator for assessing the Sub-Fund's performance. The Sub-Fund's portfolio is not limited to, or constrained by, the constituents of the Index. The Sub-Fund has not designated the Index as a reference benchmark for the purpose of the Sustainable Finance Disclosures Regulation. Firstly, companies operating in areas such as weapons production, fossil fuels, tobacco and gambling are excluded from the Sub-Fund's investment universe.

Following these exclusions, Gulf International Bank (UK) Limited, the Sub-Fund's investment manager (the "Investment Manager"), uses a bottom-up analysis in order to integrate fundamental environmental, social, and governance ("ESG") factors to identify companies that have a positive impact on particular sustainability themes such as healthcare, education, nutrition, transport safety, clean energy, e-mobility, resource efficiency and water.

The Investment Manager will rely on its own proprietary research and 3rd party research to identify recognised global sustainability challenge such as those contained in the United Nations Sustainability Development Goals, these are the "sustainability drivers". The sustainability drivers are used to identify particular sustainability themes and are then integrated into the Sub-Fund's management process.

The above ESG analysis in addition to other factors such as governance practices are used to complete the analysis of each company which allows the Investment Manager to produce its own forecast of the company's future earnings and valuation, together (where possible) with an assessment of the positive ESG impacts associated with those forecasts.

Intended Retail Investor: This product is intended for investors, with a basic knowledge of and no or limited experience of investing in funds seeking to increase the value of their investment over the recommended holding period with the ability to bear losses up to the amount invested.
