## What is this product?

**Type:** Shares of a Sub-Fund of Amundi Alternative Funds II PLC, a Public Limited Company.

**Term:** The term of the Sub-Fund is unlimited. The Management Company may terminate the fund by liquidation or merger with another fund in accordance with legal requirements.

**Objectives:** The Sub-Fund is an active UCITS and is not managed in reference to a benchmark.

The Manager, Amundi Asset Management, has appointed Chenavari Credit Partners LLP as Sub-Investment Manager to implement the trading strategy.

The investment objective of the Sub-Fund is to (i) seek medium term capital appreciation by analysing trading and/or investment opportunities (such as market inefficiencies where current prices do not reflect fair valuation, arbitrage situations to benefit from temporary unjustified valuation difference between maturities predominantly in credit markets) and (ii) benefit from trends, price movements and price volatilities where the current market valuation does not reflect the true value as perceived by the Sub-Investment Manager.

The investment strategy seeks to provide consistent absolute returns by active trading and investments principally in a portfolio of credit strategies (the "Investment Sub-Strategies"), with the objective to benefit from opportunities in the credit markets. All positions in Financial Instruments will be selected by the Sub-Investment Manager (depending on market opportunities) based on its decision to create long and/or short positions in an underlying issuer or issuers in order to implement the Investment Sub-Strategies.

In order to assist in identifying investment opportunities to implement the investment strategy, the Sub-Investment Manager conducts credit fundamental analysis by deploying, amongst others, its proprietary research database and tools. Combining a bottom-up analysis with a top-down macro market assessment, value opportunities are identified and exposure limits are defined. The Sub-Investment Manager will seek to mitigate the risk of any rate increases in the market negatively affecting the value of the Sub-Fund's holdings. It will do so through hedging against adverse interest rate movements.
