## 2 PRINCIPAL ACCOUNTING CONVENTIONS

### ■ PRESENTATION OF THE FINANCIAL STATEMENTS

The Fund's financial statements were prepared in accordance with the legal and regulatory provisions in force in Luxembourg concerning undertakings for collective investment.

The financial statements are presented on the basis of the latest Net Asset Value ("NAV") calculated during the financial period. In accordance with the supplement dated September 2023 to the prospectus dated May 2023, the NAVs were calculated using the latest market values and exchange rates known at the time of the calculation meaning:

- For all Sub-Funds except Amundi Funds Equity MENA: official NAV dated 29 December 2023;
- For Amundi Funds Equity MENA: official NAV dated 28 December 2023.

In the semi-annual report as at 31 December 2023, the Sub-Funds merged or liquidated during this year are shown separately in the Statement of Operations and Changes in Net Assets and are included in the combined figures.

The financial statements of the Fund and each of its Sub-Funds have been prepared on a going concern basis of accounting.

The objective of Amundi Funds Protect 90 is to provide a participation in financial markets evolution while also providing permanent partial protection of your investment over any given 3-year period. Specifically, the Sub-Fund is designed to ensure that its share price does not fall below 90% of the highest net asset value reached since the last business day of the preceding month of April, as per prospectus.

- **Cross Sub-Funds investments** - As at 31 December 2023, the value of the investments made by Sub-Funds in other Sub-Funds of the SICAV amounts to EUR 866,206,067.65 corresponding to 1.20% of the total net asset value. Therefore, the total combined NAV at the year end without those cross investments would amount to EUR 71,196,707,393.35.
- **Securities portfolio** - Transferable securities listed on a Stock Exchange or on a regulated market are valued at their last known price. When these prices are not representative or when securities are not listed, they are valued at their reasonably probable realisation value, determined with care and in good faith by the Board of Directors.
- **Conversion of items expressed in foreign currencies** - The Fund's financial statements are expressed in Euro (EUR). Net assets of each Sub-Fund expressed in foreign currencies are therefore converted and combined in EUR at the exchange rate in force at the close of the financial year. Transactions and acquisition costs for portfolio securities expressed in foreign currencies are converted into the accounting currency of the Sub-Fund concerned at the exchange rate in force on the date of transaction or acquisition, as appropriate. Valuation values for securities in the portfolio and of other assets and liabilities expressed in foreign currencies are converted into the accounting currency of the Sub-Fund at the exchange rate in force at the end of the financial year. Currency differences resulting from these conversions are recorded under the caption "Reevaluation of consolidated Net Assets" in the Statement of Operations and Changes in Net Assets.
- **Return on investments** - Dividends are entered as yields on the date when they are declared and in so far as the appropriate information can be obtained by the Fund. Interest is accrued on a daily basis.

<sup>1</sup> For purposes of minimum initial investment, we aggregate the investments of a given investor (or group of entities fully owned by the same parent company) across the entire SICAV (all share classes and all Sub-Funds). Minimums apply in USD or equivalent amount in any other currency.

<sup>2</sup> For Volatility Euro and Volatility World, may be up to 2.00% higher if the board determines that new investments may adversely affect the interests of existing shareholders.

<sup>3</sup> In I2 and A2 share classes, Board approval is not required.

<sup>4</sup> For A4 share classes, switch is only possible between A4 share classes of another Sub-Fund of the UCITS.

- **Distribution of costs and expenses** - Each Sub-Fund is charged with costs or expenses specifically attributable to it. Costs and expenses not attributable to a specific Sub-Fund are distributed between the Sub-Funds on an equitable basis, in proportion to their respective Net Assets.
- **Repurchase agreements** - Repurchase agreements (Repos) are equivalent to borrowings guaranteed by underlying assets presented in the securities portfolio of the Sub-Fund which remains exposed to market risk. Reverse Repurchase agreements (Reverse Repos) are similar to guaranteed loans. In this case, the Sub-Fund is not subject to the risk of depreciation in the value of the underlying assets. Repos and Reverse Repos are regarded as borrowings and loans, respectively, of the sum of liquid assets received and/or paid.
- **Futures contracts** - Unexpired futures contracts are valued at their last known price on the date of valuation or on the closing date and unrealised appreciations or depreciations resulting from them are recorded in the Statement of Net Assets. Net realised and net change in unrealised gain/(loss) on futures contracts are recorded in the Statement of Operations and Changes in Net Assets.
- **Futures-style options contracts** - Futures-style options contracts are valued at the quoted price available on an official stock exchange. Initial margin deposits are paid in cash upon entering into the contract. Subsequent positive or negative cash-flows, referred to as variation margins, are paid or received by the Sub-Fund periodically and are based on changes in the market value of future-style options contracts. When the contract is closed, the concerned Sub-Fund records a realised gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the opening transaction. Net unrealised appreciations or depreciations on futures-style options contracts are recorded in the Statement of Net Assets. Net realised and net change in unrealised gain/(loss) on futures-style options contracts are recorded in the Statement of Operations and Changes in Net Assets.
- **Forward foreign exchange contracts** - Unexpired forward foreign exchange contracts are valued at the exchange rates applicable on the valuation date or on the closing date and unrealised appreciations or depreciations resulting from them are recorded in the Statement of Net Assets. Net realised and net change in unrealised gain/(loss) on forward foreign exchange contracts are recorded in the Statement of Operations and Changes in Net Assets.
- **Valuation of options and swaptions** - Options officially listed on a stock market or any other regulated market, operating in a regular manner, recognised and open to the public, are valued on the basis of their closing prices on the valuation day or, in the absence of such prices, on the basis of the last-known prices available. OTC options including swaptions are marked-to-market based on the elements laid down in their contracts. If the last known prices for listed options or the calculated price for OTC options are not representative, the valuation will be based on the potential realisation value estimated by the Board of Directors of the SICAV with prudence and in good faith. Net realised and net change in unrealised gain/(loss) on OTC options and swaptions are recorded in the Statement of Operations and Changes in Net Assets.
- **Swaps** - The Fund is authorised to enter into variance swaps, credit default swaps, total return swaps, inflation swaps, asset swaps, interest rate swaps or currency swaps. Those swaps are recorded at market value based on the valuation elements laid down in the contracts. The unrealised net gain is included in the item "Unrealised net appreciation on swaps and CFD" in the Statement of Net Assets and the unrealised net loss is included in the item "Unrealised net depreciation on swaps and CFD" in the Statement of Net Assets. Net realised and net change in unrealised gain/(loss) on swaps are recorded in the Statement of Operations and Changes in Net Assets.
- **Money market instruments** - The money market is a financial instrument with high liquidity and very short maturities. It is used by participants as a means for borrowing and lending in the short term, with maturities that usually range from overnight to just under a year. For the money market instruments, the accretion (difference between cost and amortised value), is reported under "Net change in unrealised appreciation/(depreciation) on investments and on debts derived from reverse repurchase agreements" in the Statement of Operations and Changes in Net Assets for securities held at year end. If the instruments have been sold or reimbursed, this result is considered as "Net realised profit/(loss) on securities sold" in the Statement of Operations and Changes in Net Assets.
- **To Be Announced securities (TBAs)** - TBA positions refer to the common trading practice in the mortgage backed securities market in which a security is to be bought from a mortgage pool (e.g. Ginnie Mae, Fannie Mae or Freddie Mac) for a fixed price at a future date. At the time of purchase the exact security is not known, but the main characteristics of it are specified. Although the price has been established at the time of purchase, the principal value has not been finalised. TBA positions are disclosed in the Securities Portfolio. The purchase of this type of security has not been settled and as a consequence, the amount corresponding to the payable due when the transaction is settled, is disclosed under "Brokers payable" in the Statement of Net Assets. The realised profits/(losses) on TBAs and changes in unrealised appreciation/depreciation are disclosed in the Statement of Operations and Changes in Net Assets respectively under the headings "Net realised profit/(loss) on securities sold" and "Net change in unrealised appreciation/(depreciation) on investments and on debts derived from reverse repurchase agreements". MBS / ABS risk Mortgage-backed and asset-backed securities (MBSs and ABSs) typically carry prepayment and extension risk and can carry above-average liquidity, credit and interest rate risks.
- **Net realised profit/(loss) on securities sold** - The "Net realised profit/(loss) on securities sold" figure of the Statement of Operations and Changes in Net Assets reflects the difference between the cost and proceeds from securities sold, including the market as well as the currency impacts.
- **Transaction costs** - The transaction costs include broker fees and fees charged by the custodian for securities and derivatives transactions. The transaction fees are excluded from the cost of securities and derivatives purchased and sold. All these fees are recorded under caption "Broker and transaction fees" in Statement of Operations and Changes in Net Assets. Refer to note 16 which describes the reception and transmission of orders fees.
- **Contracts for difference (CFD)** - At each valuation date, the difference in price between the opening price and the current market price of the underlying security or index to the CFD is recorded as the market value (unrealised gain or loss) of the contract; when the Sub-Fund enters a closing transaction, the difference between the opening notional amount and the closing notional amount of the underlying security is recorded as a realised gain or loss under captions Net realised profit/(loss) on swaps and CFD in Statement of Operations and Changes in Net Assets. Initial margin deposits may be made in cash upon entering in CFD. Subsequent payments, referred to as variation margins, are made or received by the Sub-Fund periodically and are based on changes in the market value of open CFD contracts.
- **Securities lending** - In securities lending and borrowing transactions, a lender transfers securities or instruments to a borrower, subject to a commitment that the borrower will return equivalent securities or instruments on a future date or when requested by the lender. The borrower must provide a guarantee, in the form of collateral, that extends throughout the loan period and is at least equal to the global valuation of the securities lent, plus the value of any haircut considered appropriate in light of the collateral quality.

Amundi Oblig Internationales is a SICAV constituted under French law and qualifies as a master fund under Directive 2009/65/EC.

The master fund invests up to 100% in:

- bonds issued or guaranteed by OECD member states,
- investment-grade bonds and convertible bonds issued by companies that are headquartered, or do substantial business, in the OECD,
- MBSs and ABSs rated AAA (S&P) or Aaa (Moody's) at the time of the purchase and downgraded not less than AA or Aa2 when held.

The master fund may enter into temporary acquisitions and sales of securities (repurchase and reverse repurchase agreements).

The master fund's net income is automatically distributed and its net realised capital gains are automatically reinvested or distributed each year, as the management company of the master fund may determine.

The master fund's investment team uses a wide range of strategic and tactical positions, including arbitrage among credit, interest rate and currency markets, in assembling a highly diversified portfolio.

The amount of the distributed income will be set annually by the management company of the master fund, based on the expected returns of the assets in the portfolio. The master fund does not compare its performance to any particular index.

The master fund's investment team seeks to exploit yield premiums from a broad investment universe (primarily bonds), using a management approach that is flexible and is based on high-conviction choices. It analyses interest rate and economic trends (top-down) to identify strategies and country and asset class allocations that appear likely to offer the best risk-adjusted returns. The investment team then uses both technical and fundamental analysis, including risk premium and credit analysis, to select securities based on their potential to generate income (bottom-up) and to construct a highly diversified portfolio that can provide a regular return.

## 18 SWING PRICING

On valuation days when it believes that trading in a Sub-Fund's shares will require significant purchases or sales of portfolio investments, the Board of Directors may adjust the Sub-Fund's NAV to more closely reflect the actual prices of the underlying transactions, based on estimated dealing spreads, costs, and other market and trading considerations. In general, the NAV will be adjusted upward when there is strong demand to buy Sub-Fund shares and downward when there is strong demand to redeem sub-fund shares. Any such adjustment is applied to all the Sub-Fund's transactions of a given day, when net demands exceed a certain threshold set by the Board of Directors. Those adjustments follow the objective to protect the SICAV's long-term Shareholders from costs associated with ongoing subscription and redemption activity and are not meant to address specific circumstances of each individual investor. For any given Valuation Day, the adjustment will normally not be larger than 2% of NAV, but the Board of Directors can raise this limit when necessary to protect the interests of shareholders.

The swing amounts posted for the period ended as at 30 December 2023 are booked in the "Statement of Operations and Changes in Nets Assets" under "net subscriptions/redemptions".

All transactions are bilateral transactions.

Sub-funds respect at all time the constraint "Cash received as collateral of OTC contracts and repurchase agreements has to be higher than the sum of deposits with credit institutions, investments in high-quality government bonds, reverse repurchase transactions with credit institutions and investments in short term money market funds". Cash is managed as a whole; the investment management process does not specifically isolate cash received as collateral from other cash. Collateral granted by the sub-funds in the context of repurchase agreements are held on segregated accounts.

The interest received and paid under reverse repurchase agreements and repurchase agreements are disclosed in the Statement of Operations and Changes in Net Assets, for each Sub-Fund under the captions "Interest received on Repos/Reverse Repos" and "Interest paid on Repos/Reverse Repos".

\* The total does not include the collateral cash.

All transactions are bilateral transactions.

For each counterparty and each sub-fund, collateral positions are followed-up globally for all OTC instrument types.

Cash collateral is managed as a whole; the investment management process does not specifically isolate cash received as collateral from other cash.

Returns and costs incurred from performance swaps transactions during the year ended 31 December 2023 are included in the valuation of the swaps.
